PROJECTS

Servus
- Developed a mobile peer to peer marketplace application which orchestrates the selling and purchasing of residential service contracts through Stripe
- Implemented a buyer and seller application with React-Native and NodeJS (express), backed by Firebase

DashFlow
- Created a personal web-browser dashboard website which allows the user to track current tasks, access their favorite website's and view calendar events
- Developed using jQuery, Ajax, PHP, MySqli, HTML and CSS.

WORK EXPERIENCE

OpenText, Ottawa ON
Software Developer   *05.2019 – 08.2019 & 05.2018 - 08.2018*
- Participated in the agile development of a Records Management dashboard, built on OT cloud platform LEAP with NodeJS, D3 JS, and Java Spring Boot, providing clients with a simplified overview of their data environment
- Developed automated unit tests using Mockito to achieve full testing coverage on all core services to ensure maintainability and robustness of code

Global Affairs, Ottawa, ON
Software Quality Analyst   *09.2017 – 12.2017*
- Automated the QA metrics generation process in VBA, quantifying employee work efforts and saving managers ~4 hours on a biweekly basis
- Performed testing of Oracle Siebel CRM and .NET web applications utilizing Worksoft Certify

OpenText, Ottawa, ON
Software QA Specialist   *01.2017 – 04.2017*
- Automated integration testing with Java, JUnit and Selenium which contributed to the successful delivery of the Microsoft Office integration to OpenText Content Server, used for real-time collaboration by OpenText clients

PWGSC, Ottawa, ON
Web Developer   *05.2016 – 08.2016*
- Was part of the core team that converted Canada.ca to the Web Experience Toolkit v4.0, which defined the templates for all new Federal Government web pages
